

In Africa Corona Epidemic Arrives Critical Level! 29 April 2020

Although the number of confirmed Corona cases still low in the African continent, the economic side effects of the epidemic already were felt badly across the continent. Lockdowns and restrictions on mobility lowered production capacity of the Africa at the first hand. While the confirmed cases in the continent already surpassed 30 thousand level, death toll arrived to 1,500. South Africa, Egypt, Morocco, Algeria, Cameroon and Nigeria are the epicenters of the epidemic in the continent.
