

60% Zimbabwe water sources are unsafe! - 14 February 2020

According to Unicef updated humanitarian situation, almost 60% of water sources in Zimbabwe are unsafe. Experts warn that this increases risk of diseases outbreaks such as typhoid, cholera and diarrhoeal. In Zimbabwe 1.9 million people are in need of safe drinking water and better sanitation. Due to economical and political crisis, health workers in country often strike for better work conditions and payment.
