

Europe’s Muslim Population and Migration Issue Discussed at IHH’s Kayseri Camp

INSAMER’s European Program researcher Selim Vatandaş delivered a presentation titled “Muslim Population in Europe and Migration Flow” in a summer camp organized by Kayseri Young IHH.

Vatandaş stressed that Europe’s Muslim population is increasing and can double in the next 30 years. He explained that the main reasons for the rising number are the international migration flow route into Europe and the fact that Muslim’s fertility rate is higher than that of Christian in Europe
